

Saad Khan

Frontend Developer (Drupal + ReactJS)

Mumbai, India | +917389177734 | saadkhan955@gmail.com

SUMMARY

Frontend Developer with 5+ years of experience building responsive, scalable, and user-centric web applications across Drupal and ReactJS ecosystems. Specialized in Drupal theming, component-driven architecture, and modern frontend engineering using HTML, CSS, JavaScript, and TypeScript. Experienced in developing custom themes, reusable UI components, and design systems while also delivering dynamic React-based applications with modern tooling. Strong focus on performance, accessibility, cross-browser compatibility, and Agile collaboration.

EXPERIENCE

ThisGainIndia (GAIN) Pvt. Ltd.

April, 2026 – Present

Drupal Developer

Remote

JOB PROFILE

- To gather and analyse requirements, produce technical designs, and build web applications using Drupal.
- Design and implement website features using Drupal CMS, including custom content types, views, blocks, and webforms.
- Responsible for integrating and customizing contributed and custom Drupal modules.
- Use of Agile methodology using tools like Jira for sprint management and task tracking.
- Use of version control systems like Git for code management and team collaboration.
- Responsible for maintaining website adherence to development processes, agreed timelines, and coding standards.
- Testing and debugging functionality to ensure reliable, error-free pages.

PROJECTS

Project: Enterprise Drupal Development & Maintenance

Worked on Drupal website development, backend functionality, and site maintenance across multiple enterprise client projects. Responsible for custom module integration, data handling, view configurations, and security updates.

Live Sites: rafbf.org | leonardcheshire.org | adder.com | kickitout.org | clpe.org.uk

Responsibilities:

- Creating and customizing Views to fetch and display dynamic content sections, blocks, and media listings.
- Integrating and configuring custom Drupal modules, Webforms, and third-party services.
- Performing routine Drupal core and module security updates, maintenance, and bug fixes.
- Collaborating with cross-functional teams using Git version control and Jira task management.

Environment: Drupal 10, Drupal 11, PHP 8.3, Twig, HTML5, CSS3, JavaScript, Git, DDEV, Composer.

BBG Bitbase India

May, 2025 – Jan, 2026

Drupal Frontend Engineer

Remote

JOB PROFILE

- To gather and analyse front end and UI/UX requirements and translate them into Drupal pages, layouts, and components.
- Design and implement Drupal themes using Twig, SCSS, and JavaScript as per provided designs and style guidelines.
- Responsible for implementing and modifying layouts, templates, and styles to maintain consistency across multiple websites.
- Use of Agile methodology with tools like Jira and ClickUp for task tracking and sprint management.
- Use of version control systems like Git for code management and collaboration.
- Design and implement website features using Drupal CMS, including cards, hero sections, navigation, forms, and listings.
- Responsible for integrating Webform and other contributed or custom Drupal modules.
- Ensure cross platform and cross browser compatibility and responsive behaviour across desktop, tablet, and mobile devices.

- Responsible for maintaining website adherence to development processes and agreed timelines.
- Testing and debugging front end functionality to ensure error free pages.
- Responsible for HTML, CSS, and SCSS validation and maintaining code quality.

PROJECTS

Project No 1: Takeda Multisite Platform Development

Worked on a large multisite Drupal platform for Takeda supporting multiple brands and medical/healthcare sites with a shared design system and reusable components. Using paragraph items and custom TWIG and SCSS to create different reusable components as well as added JavaScript for enhanced functionalities whenever required like sliders etc.

Live URLs: takeda-gastroenterologie.de | dengue.de | passion-haemostaseologie.de

Responsibilities:

- Website design and component implementation using design specifications (Figma/PSD).
- Created and customized Twig templates, preprocessors, and SCSS for reusable components (hero cards, CTAs, cards, navigation, event listings, user badges, media components).
- Creating and customizing Views to fetch and display data, dropdowns, menus, blocks, regions, and dynamic content sections.
- Implementing responsive design for tablet, mobile, and desktop, fixing layout issues, spacing, alignment, and breakpoint behaviour across devices.
- Cross-browser compatibility and testing to ensure consistent rendering and behaviour across major browsers.
- Creating and enhancing forms with validation including registration forms, modals, and Webform integrations with client-side validation, error handling, and user feedback.
- Theme customization and extension using Drupal theme system, base themes, and custom theme generators to support multiple site variations and brand-specific styling.
- JavaScript and jQuery development for interactive features including modal handling, dynamic field visibility, form state management, infinite scroll, and AJAX interactions.
- SCSS/CSS development and maintenance following best practices, fixing linting issues, refactoring for maintainability, and ensuring code quality standards.
- HTML and CSS validation ensuring semantic markup, accessibility considerations, and standards compliance.

Environment: Drupal 10, Drupal 11, PHP 8.3, HTML5, SCSS/CSS3, JavaScript, jQuery, Twig, Git, DDEV, Composer.

MSOL Technologies Pvt. Ltd.

April, 2024 – Sep, 2024

Drupal Frontend Developer

Remote

JOB PROFILE

- To gather and analyse requirements, produce technical designs, to create the website.
- Responsible for Gathering Asset Provided by the client.
- Use of Agile methodology using tools like Jira and ClickUp.
- Use of Version control like git.
- Design and implement websites using CMS (Content Management system) like Drupal.
- Responsible for maintaining website adherence to development processes and agreed-on timelines.
- Integrated Webform and other modules.
- Cross-platform compatibility knowledge, testing the website to make it error-free.
- Responsible for HTML and CSS validation.

PROJECTS

Project Name: Wasl.ae

Created custom webforms and components based on Figma design using Twig, HTML, SCSS, PHP, and JavaScript using Drupal features like template override, preprocessing functions, and build tools like Gulp.

Live URL: wasl.ae/en

Responsibilities:

- Installing and setting new Drupal instances locally using Lando.
- Installing Composer and Drush.
- Enabling Twig Debug and turning off the cache.

- Setup Build Tool Gulp to convert SCSS into CSS and minifying JS.
- Used PHP in custom forms and preprocessors.
- Used TWIG, HTML, CSS, and JavaScript to create components and forms that match Figma designs.

Fork Technologies

April, 2023 – April, 2023

Software Engineer

Remote

- Setup Drupal locally on Linux machine.
- Gathered and analysed requirements to produce technical designs.
- Designed and implemented websites using Drupal CMS, creating REST APIs in Drupal using Views.

Specbee

Aug, 2022 – Jan, 2023

Drupal Frontend Developer

Remote

Project: ETF.com

Developed a Drupal theme from scratch based on Figma designs using HTML, CSS, Sass, JavaScript, template overrides, preprocessing functions, and Gulp.

Live URL: etf.com

- Installing and setting new Drupal instances locally using Lando.
- Setting up theme structures (.info, .library, .theme files and template folders).
- Used Pattern Lab to break down UI into smaller reusable components.
- Used Layout Builder to create pages according to Figma design.

QED42

Mar, 2022 – Aug, 2022

Engineer Frontend

Remote

- Design and implement websites using Drupal CMS, integrated Panels and other modules.
- Building Drupal themes from scratch using PSD files, Gulp, SCSS, and JavaScript.

Ornate Software Solution Pvt. Ltd. (OSSPL)

Dec, 2018 – Mar, 2022

Web Developer

Navi Mumbai

Project: Indian Government Websites

Developed accessible, responsive websites for Indian government departments (maef.nic.in, py.gov.in, plantaauthority.gov.in). Focused on W3C validation, GIGW guidelines, screen-reader accessibility, multi-language translation, and interactive JavaScript chart widgets.

REACTJS PROJECTS

Mystic Favicon Studio — Web + Hybrid Mobile Application (PWA + Android)

Live URL: mysticfavicon.tech

Developed a favicon generation studio enabling users to create, preview, and export multi-resolution favicon assets (16x16 to 512x512) for web and mobile platforms.

Ainexorium — EdTech Platform

Live URL: ainexorium.com

Developed an interactive education platform delivering institutional content, dashboards, and learning interfaces through a scalable component-driven frontend system.

GNS — Corporate Business Platform

Live URL: gns.systems

Engineered a corporate digital presence platform focused on service showcases, brand communication, and lead generation.

Limatch — Enterprise Business Platform

Live URL: limatchsolution.in

Developed a scalable enterprise frontend platform using React, TypeScript, Vite, Zustand, DOMPurify, and Framer Motion.

EDUCATION

- **Bachelor of Engineering in C.S.E Dropout:** April, 2013 – March, 2015
- **Passed 12th with 58% from MP Board:** April, 2012 – March, 2013
- **Passed 10th with 6.2 CGPA from CBSE Board:** April, 2010 – March, 2011

SKILLS

Drupal & Backend: Drupal (7/8/10/11), Twig, PHP 8.3, Drush, Composer, DDEV, Lando
Frontend & Web: HTML5, CSS3/SCSS, JavaScript (ES6+), ReactJS, TypeScript, jQuery, Gulp, Vite, Tailwind CSS
Tools & Workflow: Git, Linux, Jira, ClickUp, Webform, Pattern Lab, Layout Builder

LANGUAGES

English (Highly Proficient) | Hindi (Native Speaker) | Urdu (Native Speaker)
